

Mobile Findings

Instructions: Login to mobile app and web app with the same credentials.

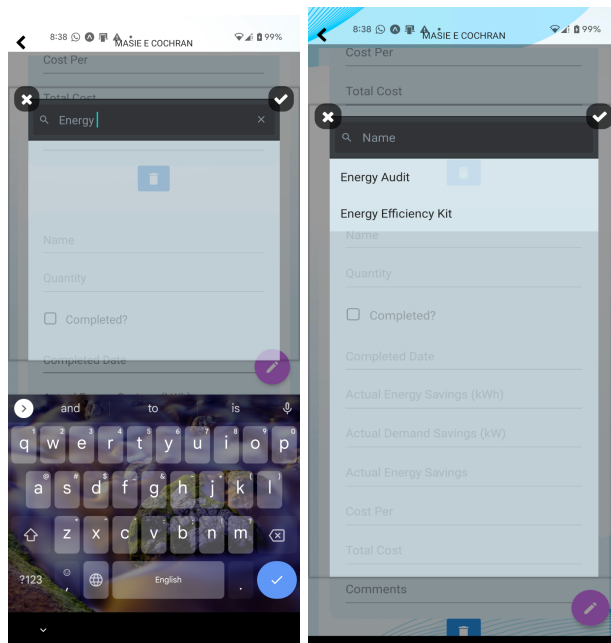

Open a record from the tasks list on the mobile app. Open that same record in the web app.

For starters just compare the data and make sure the data is the same on the mobile app as on the web.

Then start making changes on the mobile and verify those changes are also made in the web app.

Test 1

- All data is same for both the mobile app and the webapp for the record i choose on mobile
- I changed the data from mobile first and after refreshing same changes were also saved for web app as well
- Similarly when i changed the data from the web app and pressed save it also changed on the mobile app
- When i was adding a line on the mobile app this is how i was seeing the panel for entering the name of the new line for nearly 10-15 seconds(Left Picture)
- After 15 seconds this popped up which i think is some kind of optimization problem (Right Picture)

Test 2

Addition and deletion of line in Auditor Improvement section in web app & Mobile App

- Addition and deletion of line successfully done from mobile app after which i saw that the same action happened in the web app as well
- Addition and deletion of line successfully done from web app after which i saw that the same action happened in the mobile app as well

Test 3

Addition and deletion of line in Weatherization Improvement section in web app & Mobile App

- Addition and deletion of line successfully done from mobile app after which i saw that the same action happened in the web app as well
- Addition and deletion of line successfully done from web app after which i saw that the same action happened in the mobile app as well

Test 4

Locating accounts using the account searcher using both the Id Number as well as the project name first name and last name of the account Berry Shewmaker on mobile (Web app is working fine and i can find and locate it properly using all of the 3 options)

- Couldn't Find this account using the Name of project
- Couldn't Find this account using the Full Name Berry Shewmaker
- Couldn't Find the account using ID number

Test 5

Chess Program is showing name instead of program id/code

- Seems to work fine Program Name appears well

Test 6

Document Section in mobile app and web app

- No option to upload documents in mobile apps
- Option is available in web app
- **After uploading the documents into the web app and saving the information still the mobile app shows 0 documents and no option to view,upload or download the documents (Tested account name is Johnathan Newman and id is 1219691)**
Screenshot shared below

Test 7

Entering the Name of an account or ID in the mobile app

- Have to press the load more button repeatedly multiple times
- Does Not Loads results even by pressing load more button repeatedly
- Does Not Give any results for some ID and project names even after multiple presses and waiting times which is troublesome

Getting Started: <https://www.loom.com/share/b0b78681a3d24cc3a17e232c36eb4032>

From the shipment data, enter the Model into the Pattern. Then enter Invoice into Invoice.

Findings

1) One of the spiffs is not working i will add a loom video for that

<https://www.loom.com/share/ae3849eac5d748cb806bc6b6d381724e>

Problems experienced in the opened (waiting for approval spiff) which are mentioned in the video as well

- No button to upload documents
- No save/finish/reset button
- Can enter and change information but no button to save it or finish
